★★★★★ **Brilliantly short and to the point!** 3 September 2014

This is a great and super useful book. I originally bought the Kindle edition, but it's so useful I then bought the paperback. It's very small (about 50 pages) - a real plus if you've still got a daunting pile of other books to read for your literature review! It's a great help for getting a clear idea of how to structure your thesis, written by someone with a great deal of experience in phd examining. And the '7 seven deadly...[Read More](#)

★★★★★ **another excellent addition to this series** 1 June 2014

another invaluable resource to any student on their PhD journey. A good reminder of what's important and what's not. Very readable and succinct with excellent advice, tips and caveats. Very good to use when planning your PhD work and a reminder of what to keep looking for at all stages of the project. I'm very pleased that I have spent the afternoon reading this short book and making notes from it because it has reminded me...[Read More](#)

★★★★★ **Excellent for Doctoral Research** 14 May 2014

Paul Trowler has produced some excellent books which walk the research student through some of the tricky areas of methodology, theory and research questions. Certainly this would be on my reading list.

★★★★★ **It is a must reading for doctoral students in higher education** 21 January 2014

It a concise guide for PhD students on writing the thesis. I can not find a book like this accessible one that focus only on higher education research especially in UK context. I would also recommend the author to publish a book on critical reading in higher education literature. the literature in higher education is versatile and far complex for novice researchers coming from different disciplines other than social science...[Read More](#)

★★★★★ **Very readable** 16 December 2013

My students and I always found Paul Trowler's books for Level 2/3 students very readable; he has the knack of explaining things in a very straight forward way - rather like having a conversation with him over a coffee. He has maintained this whilst writing for doctoral students and Paul, I thank you!

★★★★★ **Very useful - recommended** 28 August 2013

I'm new to doctoral study and needed a bit of a boost to my confidence and this has helped a lot. Paul Trowler writes in a very easy style for which I am grateful. He writes very clearly, in plain English and I look forward to referencing his text in my up-coming assignment!

It is also a short text and so I did not feel at all hard-done-to reading it whilst on holiday, on the beach!

★★★★★ **fantastic little series for PhD students** 29 March 2013

An absolute MUST in my view. Lots of clear, useful tips. I particularly like the '7 deadly sins' of each of the major sections e.g. of the Methodology section, the Literature section, the Data Presentation section - for each of the major sections. I'm really pleased that I've read 3 of these booklets now, as my proposal has just gone in ... and these have been invaluable ... not only for the proposal, but will be used as my...[Read More](#)

★★★★★ **best - kept secret! A must for PhD wannabees** 29 March 2013

This little series goes under the general heading 'must haves' if you're embarking on a PhD thesis. Concise, precise and full of great, practical tips on how to 'do it well'. In my view, I am SO pleased that I discovered these little booklets at this stage, for my proposal has just gone in and I do not intend to fall into any traps of which I would have been totally unaware! So if you buy nothing else, I can highly recommend...[Read More](#)

★★★★★ **another little gem in this series!** 29 March 2013

Fabulous! An absolute must if you are starting a PhD journey. Concise and easily understood. Lots of excellent, practical tips that I, for one, have every intention of using in practice. I'm really glad I've read 3 in this series all three were read and my notes done in about a day or so so I have a good grounding for starting my

PhD...[Read More](#)
